## Explosion-Protected LED-Light Fitting for Zones 1 and 21 Series e865...

### Application:

Hazardous locations of zones 1 (gas) and 21 (dust) as standard illumination or as emergency illumination in combination with external power supply units.

### Design:

**Housing:** Glass fibre reinforced polyester resin.

**Cover:** Injected polycarbonate, frosted (F) or clear, silicone gasket.

**Closure:** Stainless steel clips (KE), two of them as safety clip (KES), to be opened with screwdriver only.

**Reflector:** Aluminium, painted, carrying the

encapsulated LED-modules and all electrical components, clipped into the cover, removable as a unit.

**Connection:** 3 poles up to 4 mm<sup>2</sup>.

**Cable entries:** 3 entries M25 x 1,5, (2 glands - one of them is plugged)

**Standard:** Facing downwards or forwards.

**Mechanical installation:**

Mounting accessories see spare parts/ accessories.

### Technical Data:

**LED:** Line modules appr. 6,500K, typically R<sub>a</sub> 80, L<sub>80B10</sub> > 50,000h at max. ambient temperature

**ECG:** 220-240V AC/DC, 0 or 50-60Hz, overvoltage, overload, short circuit, excess temperature protection

### Options:

- dimmable via DALI-interface (DIMD)
- with through-wiring 5 x 2,5mm<sup>2</sup>

- for higher ambient temperatures up to +70°C depending on version

### SCHUCH Quality - your advantage:

- LED modules with innovative encapsulation
- Explosion Group IIC, hence suitable for atmospheres with hydrogen and acetylene
- highest efficiency with luminous efficacy up to 142lm/W
- homogeneous illumination by using frosted diffusers (versions e865F..) no particular light points visible, comfortable perception of light, brilliant glare limitation
- high colour reproduction R<sub>a</sub> typically 80, according to the workplace guide lines suitable for nearly all plant locations
- Reflector and cover in sandwich design to protect the LED-Modules from mechanical or electrostatic damages due to accidental contact.
- version with higher luminous flux for areas where higher illumination is needed
- for high ambient temperatures up to +70°C depending on version
- external mounting system for variable mounting distances and easy installation (retaining clips HK865 P)
- lower maintenance and downtime costs due to long maintenance intervals
- ECG and reflector with LED-modules replacable by qualified personnel on-site

### Note:

This light fitting is not suitable for applications in areas with permanent high humidity in combination with only short periods of operation, such as sewage or stormwater retention tanks or water treatment plants.

### Notes:

**Limitations for LED-light fittings:** See chapter „Use of LED lighting in corrosive atmospheres“ in the Technical Appendix.

All technical data is relevant at the time of print. Actual technical data can be found in the internet under [www.schuch.de](http://www.schuch.de).

## e865...

II 2 G Ex eb mb op is q IIC T4 Gb

II 2 D Ex tb op is IIIC T80°C Db

IP66

EC-Type Examination Certificate:

IBExU 16 ATEX 1008

Ignition protection: eb

Marking:

II 2 G Ex eb mb op is q IIC T4 Gb (Zone1)

II 2 D Ex tb op is IIIC T80°C Db (Zone 21)

Rated voltage: 220-240V AC/DC, 0 or 50-60Hz.

Permissible ambient temperature:

-30°C up to see article table
